4) Select USB Stick. Space needed is indicated above

5) Validate upload to USB stick

TELECHARGER VERS LA CLE USB

E:\TOOLBOX_USB

64.0 Ko utilisés 23.92 Go requis

> Confirmez la dernière installation ou choisissez un autre VIN à mettre à jour.

HOW TO USE ALLIANCE UPD@TE? DOWNLOADING

6- Download « on going » with remaining time and step of the USB stick preparation process

7-Download finished. Waiting for vehicle treatment. When vehicle is updated, the installation must be “confirmed” or “dismissed”.

HOW TO USE ALLIANCE UPD@TE? VEHICLE TREATMENT

The screenshot shows the ALLIANCE UPD@TE application window. At the top, there's a header with the logo, the text 'ALLIANCE UPD@TE', a help icon, a settings icon, and a VIN input field containing 'VF1RJA00161998350' with an 'AJOUTER' button. Below the header, the main area displays the VIN 'VF1RJA00161998350' with a status 'En attente de confirmation'. A table lists software updates:

Mises à jour	Version	Statut
<input checked="" type="checkbox"/> Màl complète logicielle du m... <small>283C3238/R</small>	Taille : 23,23 Go Temps d'installation : ...	Désolé, la dernière version n'est pas disponible sur votre R-Box.
<input type="checkbox"/> Màl complète de la Cartogra... <small>25841652-b414-4d66-abe4-cce67dc165fa</small> <small>ALB AND ARM AUT BEL BGR BIH BLR CHE CYP CZE DEU DNK ESP EST FIN FRA FRO GBR GB... more...</small>	2018.09 Taille : 18,93 Go Temps d'installation : N/A	TERMINÉ <input type="button" value="CONFIRMER"/> <input type="button" value="REJETER"/>

At the bottom, there's a section for USB treatment. It includes a button 'TELECHARGER VERS LA CLE USB', a USB icon, a dropdown menu showing 'E:\TOOLBOX_USB', a progress bar indicating '64.0 Ko utilisés' and '23.92 Go requis', and a confirmation message: '> Confirmez la dernière installation ou choisissez un autre VIN à mettre à jour.' The version 'V.1.15.4' is shown in the bottom right corner.

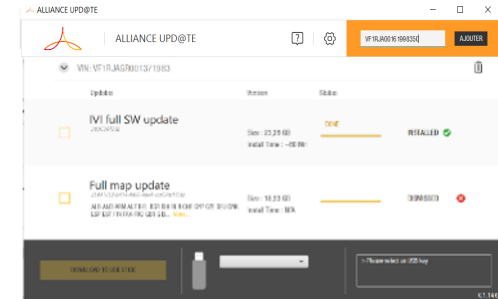

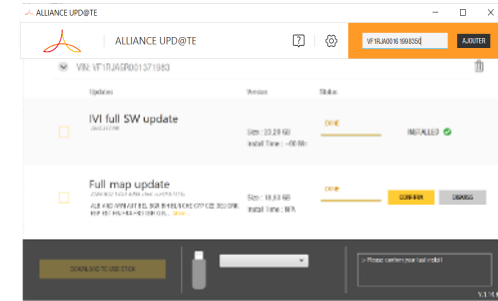

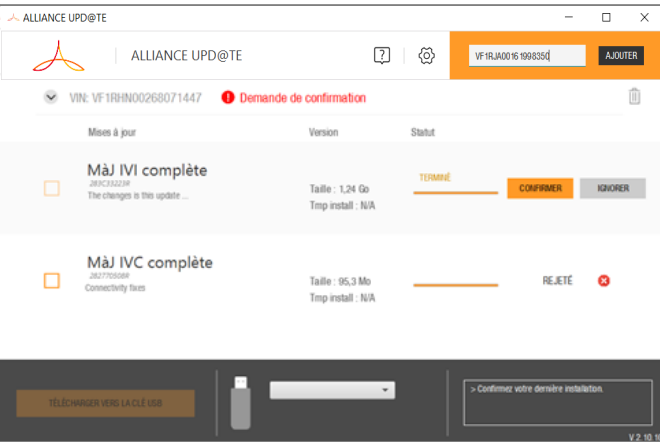

When a vehicle is on treatment (USB stick plugged on vehicle), the ALLIANCE UPD@TE instance must be kept opened.

If ALLIANCE UPD@TE is closed, it will be necessary to create **again** the USB stick and to propose « confirmation » features.

HOW TO USE ALLIANCE UPD@TE? CONFIRMATION

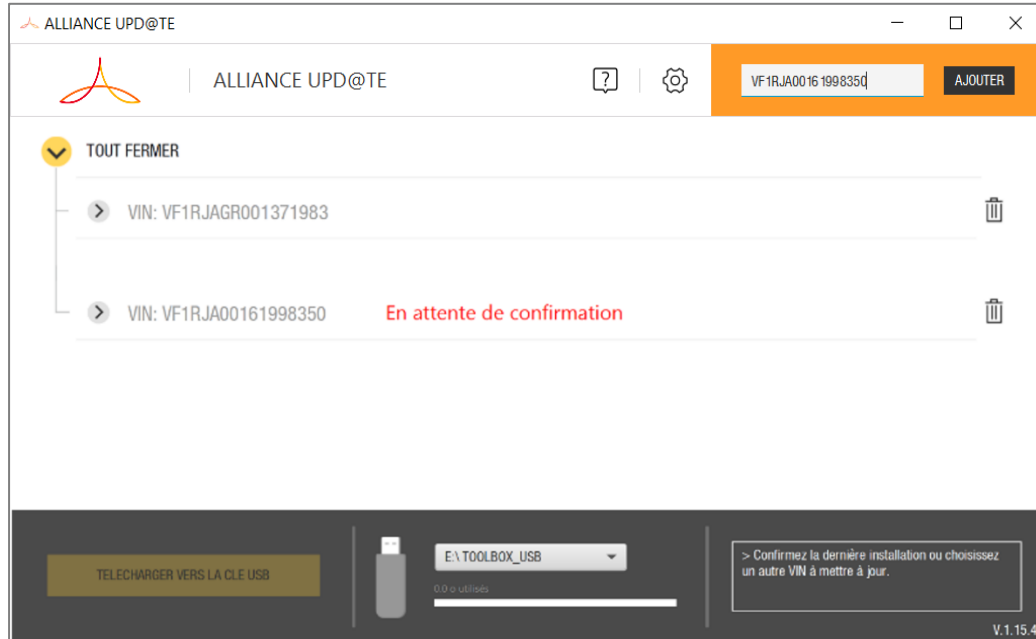

When installation on vehicle are completed, **it is mandatory to re-plugged USB stick on ALLIANCE UPD@TE to close updating campaign**

When installation successful

When installation Failed

HOW TO USE ALLIANCE UPD@TE? CONFIRMATION

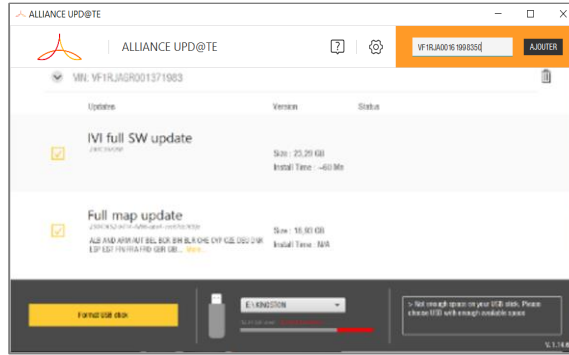

Several vehicles can be dealt within the same ALLIANCE UPD@TE session.

Here, two vehicles under treatment.

The first is ready to create an USB stick with updates proposed.

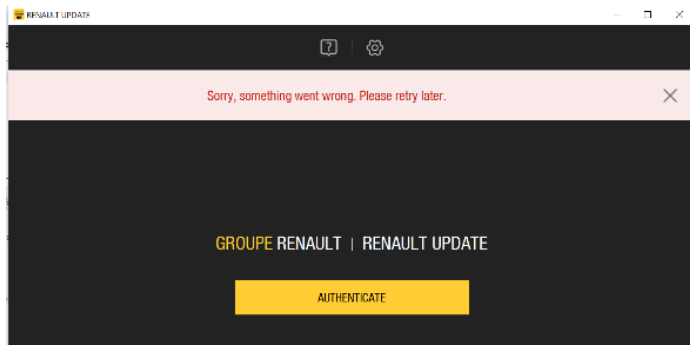

The second waits vehicle installation confirmation.

HOW TO USE ALLIANCE UPD@TE? FORMAT FAT32 FEATURE

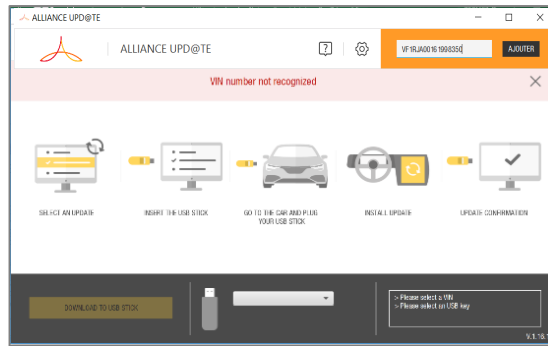

- When, not enough space available on USB stick a format function is proposed to empty and format the USB stick in FAT32 format. This feature is currently available only for 32GBytes (insufficient space for IVI software update + MAP IVI update + IVC update).
- Format feature USB stick higher than 128Gbytes is implemented.
- Risk: If you've got other files on the USB stick they will be removed and definitively lost

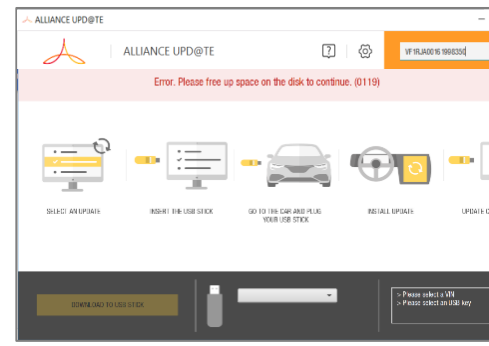

HOW TO USE ALLIANCE UPD@TE? CLASSICAL ERRORS

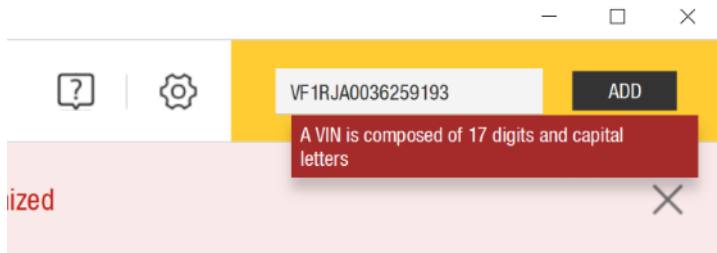

1) Token certificate is expired or not granted

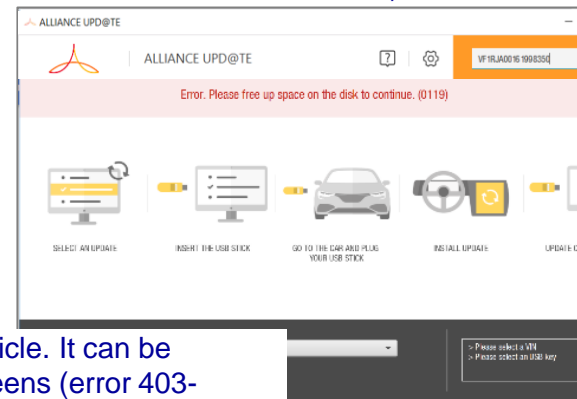

2) VIN unknown since without compatible telematics (Easy Link or Open R-link)

3) Not enough space on computer to store new updating files. (17Gbytes must be available on the PC)

4) VIN error type check

5) Data sharing is « off » inside vehicle. It can be switched to « On » through IVI screens (error 403-Privacy mode currently ON)

INSTALLATION ON BOARD : EASY LINK

Monitoring of IVC download

IVC update: On board vehicle installation story board (2/3)

ATTENTION :

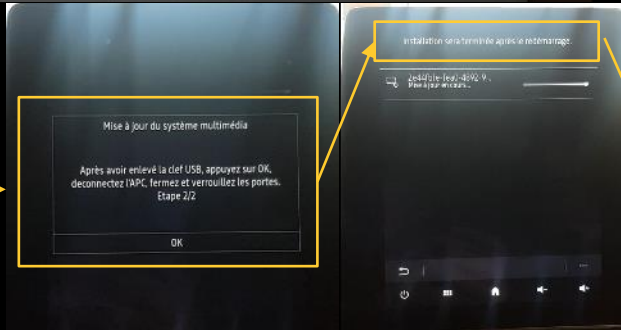

Lorsque le message « Retirer la clé USB, appuyer sur OK, débrancher l'APC, fermer et verrouiller les portes » s'affiche à l'écran, valider simplement les informations, puis retirer la clé USB.
A cette étape, ne pas couper le + après l'allumage, même si il est affiché sur l'écran de navigation.

29. Vérifier que le paramètre suivant est passé à « EFFECTUE »

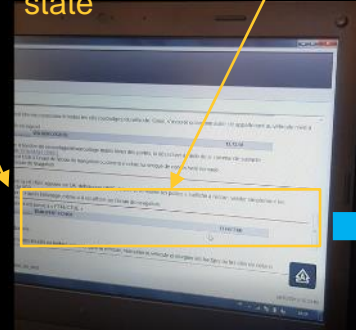

TRANSFERT FICHIER

NON EFFECTUE

At this stage CLIP is mandatory to support ALLIANCE UPD@TE process.
Follow SIE 502: after part replacement for IVC

Transfert fichier status must be @ « effectué » state

Put Vehicle in sleep mode for 40minutes

Vehicle wake up

Sucessfull pop-up

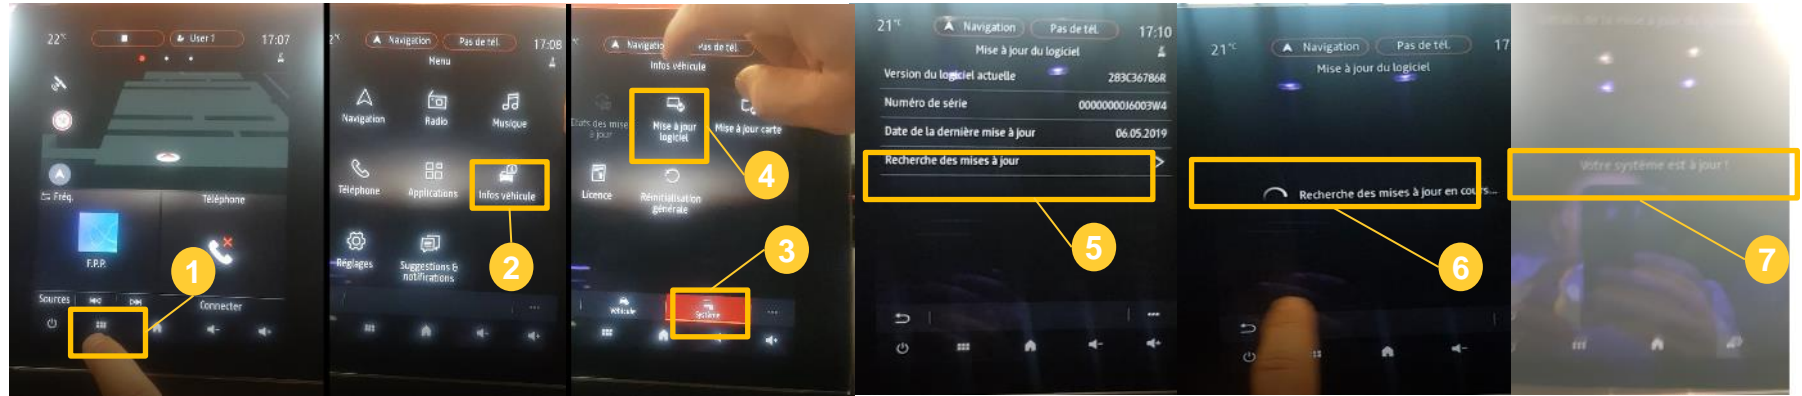

OR

Failed message pop-up

Go to check for update

IVC update: On board vehicle installation story board (3/3)

- This check leads to update tracking database
 - Needed for invoicing
 - Needed for the mastery of vehicle definition

IMPORTANT: Check for update must be launched after update.

INSTALLATION ON BOARD : OPEN RLINK

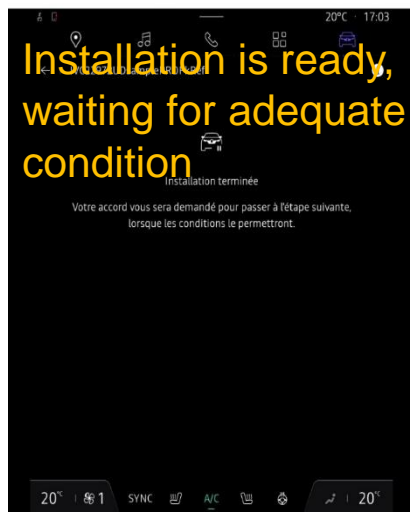

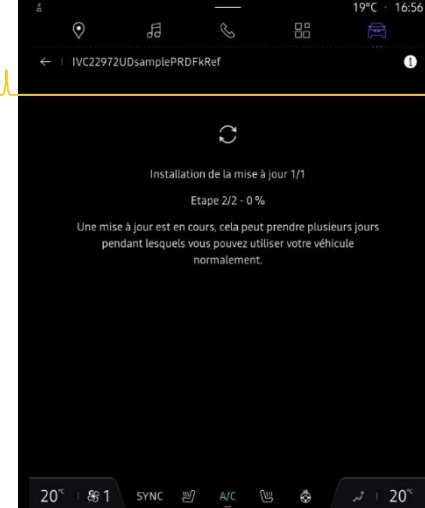

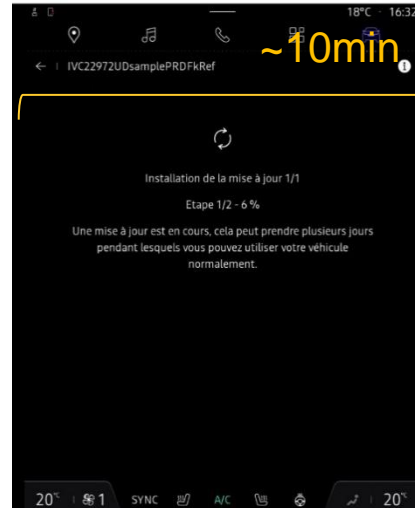

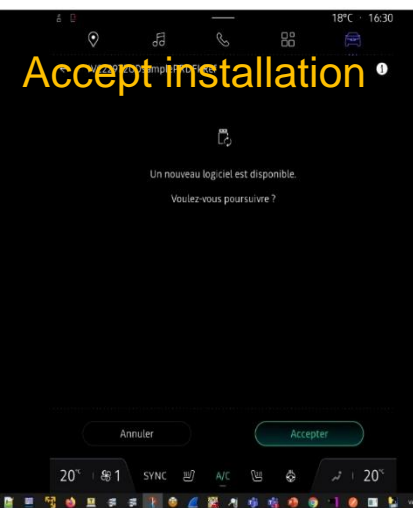

Vehicle must be in forced APC mode

Plug USB key

Clic on notification

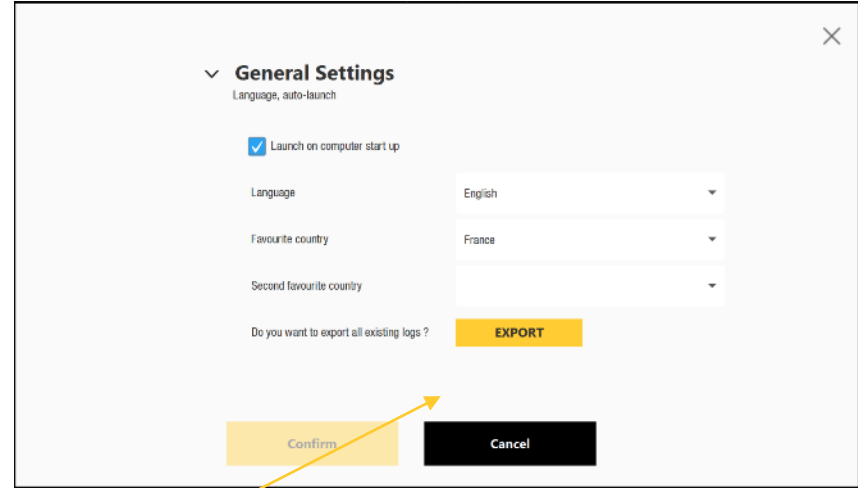

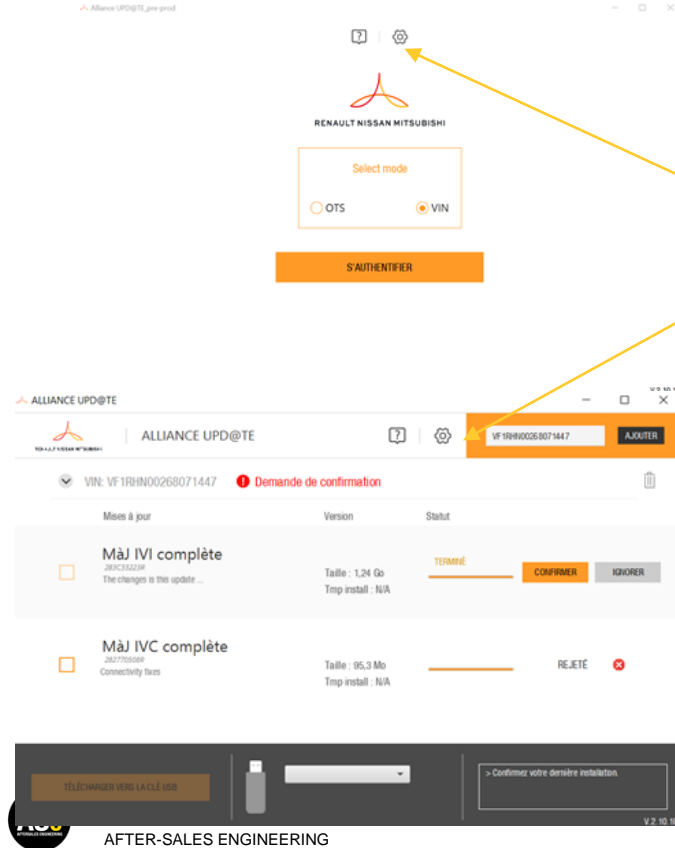

PREREQUISITE, GOOD PRACTICE AND TIPS

PREREQUISITE, TIPS, GOOD PRACTICE

	Prerequisite	Good practice	Tips
Process	- After installation in the vehicle, USB stick must be returned to ALLIANCE UPD@TE	Never close a ALLIANCE UPD@TE session till all vehicles are not « confirmed » (Fully treated)	
USB Stick	- FAT32 Only -Choose a 64Gbytes USB stick at least -USB 3.1, USB 3.0 strongly recommended. (writing speed on USB is an important criteria to consider)	→ 128 GBytes is better to manage re-use of package already on the USB	
Computer to support	<ul style="list-style-type: none"> - Windows 10, 64 bits - Desktop environment connected with Ethernet cable instead of WIFI 		- As file must be installed in the local desktop cache, it is better to use the same machine or reduce number of machine to support ALLIANCE UPD@TE
Re-use of USB stick	(V1 only) : the remaining space on the USB stick must be the size of the update to be checked.		

GOOD PRACTICE : HOW TO PROVIDE DIAGNOSTIC DATA FOR TROUBLESHOOTING

Go to Setting page:

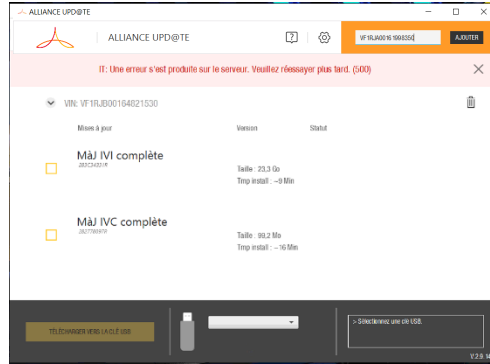

1. Push this button to collect and save the logs to a folder you can choose (typically: Desktop)
2. A confirmation is shown and the chosen folder pops out.
3. Send the resulting file to your support team.

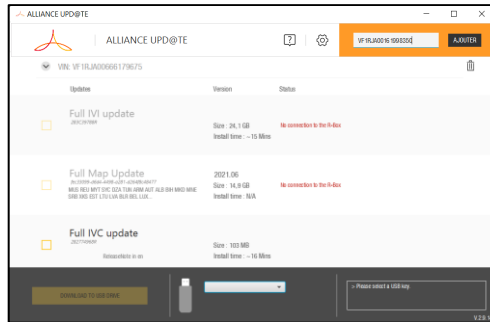

ISSUE: HOW TO MANAGE ?
