

BEFORE INSTALL “Renault Net KIT Full Internet”

1. In first, your PC must have **Windows update** up to date.
2. Before install the RNFI Master, Check in Control Panel > Program and Features (appwiz.cpl)

In this order, UNINSTALL all Renault components and **Restart** your Computer:

3. Run RNFI MASTER Installer **with Administrator Rights (right click run as administrator)**

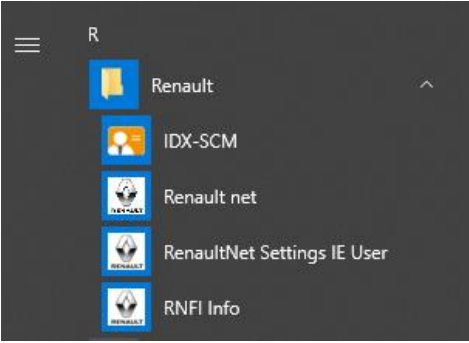

if you encounter an error (installation aborted), maybe the Microsoft DotNet component on your system is not correct :

In this case, please download and install Microsoft Dotnet component available on this link :

<http://go.microsoft.com/fwlink/?LinkId=2085155>

Run again RNFI MASTER Installer.

4. After INSTALL the “Renault Net KIT Full Internet”, you have 4 links in the Start Menu / Renault:

And this programs in “Program and Features”:
